

Hinges and locking solutions for industrial equipment

PINET is specialised in designing and manufacturing hinges and locking devices

- A **wide range** of standard products in stock
- We **manufacture** according to customer drawings
- We **design** and **manufacture** to meet customer specifications
- Various products have **integrated functions**
- **Metal sheet** or **machined profile** manufacture
- Products manufactured from **steel, stainless steel** and **aluminium**
- Capacity to roll up to up to **6 mm thick**
- **Surface** and **decorative** treatments (zinc plating, cathoporesis, ...)
- **Small, medium** and **large production** runs
- **Optimised tools** for production
- **Rapid prototypes** for evaluation purposes

Standard products

**Application
Photo booth**

Continuous hinge for technical area access door

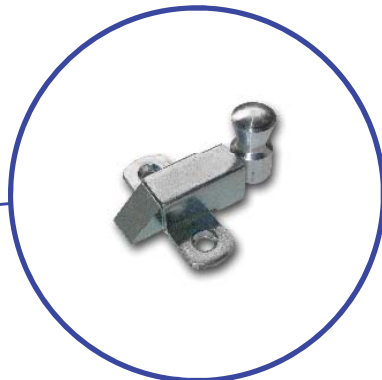

Specific features: **easy** length adjustment by the sub-contractor who produces the structure. Also available in **AISI 304 stainless steel** and aluminium

**Application
Drinks dispenser**

Automatic cover slide for technical area access

Specific features: **compact**, locking without any manual intervention on opening, **automatic unlocking** by slightly raising the cover, zinc plated steel

**Application
ATM-Cash dispenser**

Printer sliding tray bolt

Specific features: compact and **robust**, with 45° catch slope, zinc plated steel, stainless steel **return spring**, aluminium **operating button**

Standard products

**Application
Packing machine**

Control unit polyamide hinges

Specific features: in glass fibre reinforced black PA , aesthetic, good mechanical and corrosion resistance

**Application
CNC machining centre**

Cover compression latch

Specific features: enables technical area access covers to be closed with no play, fully integrated into the assembly

**Application
Printing machine**

Hi-Klik[™] indent hinge for control screen angular positioning

Specific features: aluminium profile, positioning every 30° for good viewing comfort

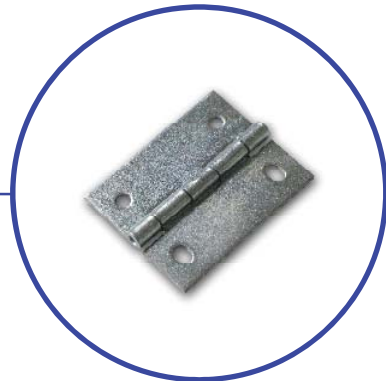

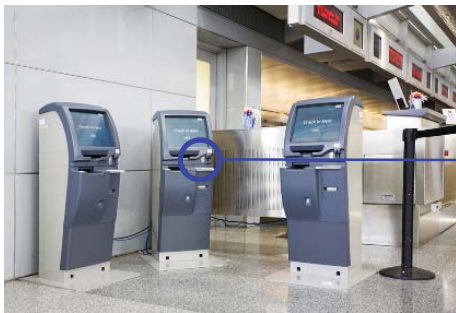

Manufacture according to customer drawing

**Application
Medical analysis
machine**

Cover continuous hinge type

Specific features: **ready to be installed**, cut to the exact length, **with round and oblong holes**, made from steel with anti-corrosion surface treatment

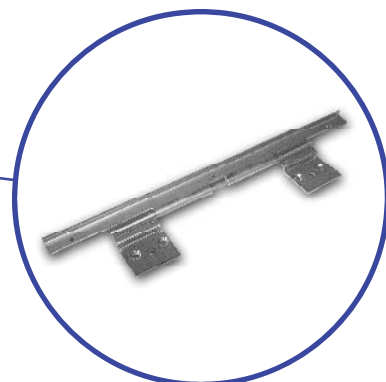

**Application
Airline ticket printer**

Access door hinge

Specific features: based on an existing hinge from our standard range, with 2 attachment **oblong holes** for **easy** cover position **adjustment**

Design to meet customer requirements

**Application
Public transport
timetable display**

Frame hinge

Specific features: **adapted shape** for full **integration** into the aluminium profile frame, made entirely from **stainless steel**
